

## Services

### MAINTENANCE and OIL CHANGES

Changing your oil every 3,000 miles (5,000 kilometers), or as recommended by the vehicle manufacturer based on your driving conditions, is vital for your vehicle and can help you avoid costly problems. With each oil change, the oil filter may also need to be replaced. A Casey's trained mechanic will select the correct weight and grade oil for your vehicle, perform lube, oil, and filter service and complete a visual check of your:

- Engine air filter
- Fuel filter
- Brake fluid
- Power steering fluid
- Automatic transmission fluid
- Coolant/antifreeze

We'll also walk you through your vehicle manufacturer's recommendations for replacing these items:
